

PLC Reflection Activity

12/16/2009

Components	Tight	Middle	Loose
Protocols	5 Makes sure on task, timer is used, everyone talks	4 Freedom to work within group	LOTS A lot of freedom is given and there is no pressure
Norms	5 Big Picture Plan...there is no room to go away from those questions. People have to turn stuff in	LOTS Reminders are given if you don't show up. We are not all the way ready to put this into practice and make it routine	3 Getting started on time...people come in when they want
AOLs	1	17 Assignments are clear and spelled out and due dates are set. Missing the accountability piece of it. Assignments are difficult to find application for in some areas	20 Some people are scrambling to get it done-not getting anything out of it. Variability in what you teach and how you get it done. Getting it done just to say its done vs getting something out of it.
Shared Responsibilities	LOTS Everyone is comfortable doing different things and all voices seem to be heard. Cooperation is happening	4 Seems to gravitate towards one or two people who take over and are natural and do the work	
Attendance	LOTS Reminders are given if you miss a meeting	5 Conflict between getting job done (having students need to come in early on PLC days) and attending the PLC	
Common Meeting Place	LOTS Email tells us where to meet...its between House 2000 and media center	3 Some are getting confused by where to go and cant keep track	
Data	9 Awareness of data this year that we have never had before. This year is a stepping stone to where we are headed	19 Have access to it and know where to find it but don't know what do to with it	4 Can find the data but there is no relevance in classroom to the data...feel like don't know what to do with the low kids even though they can be identified. There has been no specific training on how to work with those kids and how to utilize the data. Don't feel that we are ready for the next step yet.
Student Samples	1 Everyone has brought student work in this specific PLC when supposed to	10	LOTS some have no work to show even though they have done the AOL
